

## About Us

Discover the future of telecommunications with TechConstruction, your one-stop solution for advanced infrastructure services. Our offerings range from construction and material management to the incorporation of innovative technologies such as 5G, LTE, and small cells.

We are not just experts in wireless and wireline network design, but also in engineering, installation, project management, and site maintenance. We stand apart with our focus on safety, quality, and value, making efficient use of our resources for your benefit.

With TechConstruction, you're choosing stability, efficiency, and a passionate commitment to your network. Step into the future of connectivity with us.

**TECH**  
CONSTRUCTION

Telecommunication services for everyone's needs

## Our Creative Team

**Infrastructure Specialists:** Comprising 7 tower crews from top US carriers, 3 civil teams for groundwork, and 2 agile tiger teams for rapid troubleshooting.

**Integration Pioneers:** 2 experts ensuring seamless network integration.

**Connection Specialists:** 4 RF crews on bucket trucks and 3 fiber teams proficient in both aerial and underground splicing.

**Commitment:** TechConstruction - shaping the telecom future, one tower at a time. Project by project, tower by tower.

**OUR MISSION**

**INNOVATIVE EXCELLENCE**  
Through hard work, we exceed expectations with top-tier telecommunication solutions.

**CUSTOMER CENTRICITY**  
We prioritize understanding and fulfilling customer needs.

**PARTNERSHIP**  
We aim to foster lasting relationships, driving mutual success for customers and stakeholders alike.

## What We Offer

At TechConstruction, we're more than a team; we're architects of a better digital future. Our specialized in-house units focus on:

- ✓ Construction and maintenance of both macro and micro cell towers, underpinning seamless wireless communication.
- ✓ Deployment of the Distributed Antenna Systems (DAS) for enhanced cellular reception.
- ✓ Broadband solutions for high-speed internet connectivity.
- ✓ Proficiency in coax splicing, ensuring reliable signal transmission.

## Why Choose Us

In the dynamic world of telecommunications, standing out requires more than just offering services. It's about delivering a promise of safety, customer satisfaction, and continuous innovation. Here's why we are the preferred choice:

### Safety Prioritized

Our stringent measures safeguard our teams and maintain network resilience.

### Client-focused Solutions

With tailored solutions and unmatched service, we prioritize your satisfaction.

### Innovation at Heart

We stay ahead by embracing and integrating cutting-edge technologies.

### Quality Guaranteed

With our commitment to service quality, we strive to exceed expectations.

### Efficient Operations

Our seamless processes ensure timely and efficient service delivery.
